# EZYCLEAN BLACK Graffiti Remover

## DIRECTIONS

1. Put on safety glasses, gloves and relevant PPE
2. Pour some EzyClean Black Graffiti Remover into a bucket and apply the product to the graffiti with a nylon bristle paint brush. Using the brush, agitate the graffiti (like you would be scribbling on a wall)
3. Some inks and aggressive permanent markers may require step 2 to be repeated.
4. Keep the graffiti wet with the product, if it dries out, the graffiti remover will not work as quickly or affectively. The Wetter...The Better
5. Always remove graffiti from small areas at a time
6. The dissolved graffiti can be removed with either damp cloth on a smooth surface. Rinse off the graffiti on brick / concrete / masonry surfaces
7. Rinse using either a pressure nozzle, trigger hose or high pressure washer on low pressure

## CLEANUP

Wash equipment with water immediately after use

## IMPORTANT

Always read the safety instructions before using any cleaning product and observe all safe working requirements eg: safety gloves, safety glasses, etc.

Wear Long Sleeves Do not apply chemical above shoulder height

Do not blast too close in order to remove the graffiti as it may cause damage to the surface and will possibly only remove a small amount of the graffiti.

The EzyClean Black Graffiti Remover is used as supplied. Do not dilute.  
Store in a cool dry place  
Shelf life 2 years
