

EZYCOAT REPEL ANTI GRAFFITI COATING

Sample Product is a cement sheet coated entirely with EzyCoat Repel Anti Graffiti Coating

TEST #1

- 1) Pour a small quantity of EzyClean Red Graffiti Remover into a bucket/container
- 2) With the brush supplied, apply the EzyClean Red to the silver spraycan paint and agitate
- 3) Once the spraycan is dissolved, wipe off with a wet cloth or rinse under a tap

What you will see is a protected message under the EzyCoat Repel Anti Graffiti Coating

TEST #2

This is to test the integrity of our EzyCoat Repel Anti Graffiti Coating

With the "dye" bottle supplied, apply a few drops to where the silver spraycan paint has been removed. You will see that it will "bead" on the surface and not penetrate. Wipe the drops off with a damp cloth.

"100% protected 100% of the time"

EZYSHIELD PENETRATING SEALER

Permanent & unsightly staining

Sample Product is a cement sheet of which half is sealed with EzyShield Penetrating Sealer

DO IT YOURSELF TEST

- 1) Place a few drops of dye on either side of the tape

One side will bead and the other side will stain

- 2) Clean sample with a damp cloth. Protected side will be clean, unprotected side will be stained

EzyShield Penetrating Sealer is ideal for all porous surfaces and will repel coffee, wine, soft drinks, sauces, food fats, urine and general organic stains

Highly recommended for Town Squares, Public Toilets and Shopping Centre Entrances

WATER BASED
 NON FLAMMABLE
 NO ODOUR
